

PRESS RELEASE

VisiCom Systems, Inc. Welcomes John E. Alexander, Jr. - Service Technician for Mississippi

STONE MOUNTAIN, GEORGIA, March 2, 2006 – VisiCom Systems, Inc., a videoconferencing systems integrator offering a comprehensive package of videoconferencing systems and services, announced that John Alexander has joined the company as Service Technician. John has over twenty-three years of experience as an electronic service technician.

Prior to joining VisiCom Systems, John served as the Lead Broadcast Technician with Mississippi Public Broadcasting. His duties included scheduling, monitoring and resolving connections for videoconferences and classes over the Interactive Video Network. His duties included travel to various sites to install and set up distant learning classroom equipment as well as repair, update or modify software issues.

“John brings a wealth of experience to support our growing customer base in Mississippi. He has an in-depth knowledge of the technology and, more importantly, understands the application and benefits of distance learning. We are very pleased that John has joined the VisiCom family”, said Leonard Salley, President of VisiCom Systems.

VisiCom Systems is a leading videoconferencing integrator specializing in the distance learning market. They have installed systems at community colleges, high schools, health departments and state agencies. VisiCom sells and services videoconferencing products from Polycom, Tandberg and VTEL.
